Mechanic – Heavy Vehicle and Mobile Plant

Fletcher International Exports Pty Ltd

Dubbo NSW

Automotive Trades (Trades & Services)

Full time

$38 – $52 per hour

Your work will be challenging, and the successful applicant will be required to work in industrial manufacturing and agricultural environments to meet strict maintenance deadlines. Our facility includes meat processing operations, a grain terminal, transport fleets and harvesting facilities, providing a diverse range of mechanical maintenance and repair activities.

At Fletcher International, our people are our strength. We invest heavily in the ongoing development, training and skill advancement of our workforce. Our philosophy is to support employees throughout their careers while ensuring the business remains at the forefront of industry best practice. Through our highly skilled workforce, we continue to deliver high-quality, safe products to domestic and international markets.

About the Role

We are seeking a **Diesel Motor Mechanic** to maintain, test, diagnose and repair diesel-powered trucks, trailers, heavy vehicles and associated mechanical systems to ensure safe and reliable operation in accordance with manufacturer specifications and Australian standards. The successful applicant will work across our transport and agricultural operations, undertaking both preventative maintenance and breakdown repairs.

Key responsibilities include:

- Detecting and diagnosing mechanical and electrical faults in diesel engines and associated vehicle systems.
- Carrying out scheduled servicing, preventative maintenance and repairs on heavy vehicles and diesel-powered equipment.

- Dismantling, repairing and reassembling engines, transmissions, steering, suspension, braking systems and other mechanical components.
- Testing, adjusting and commissioning repaired components and systems to ensure optimal performance.
- Using diagnostic equipment and computer-based testing systems to identify and rectify faults.
- Responding to breakdowns and carrying out unplanned maintenance to minimise operational downtime.
- Completing maintenance records and complying with workplace health, safety and environmental requirements.

About You

We are seeking someone with experience and attributes that include:

- Demonstrated industry experience as a **Diesel Motor Mechanic**, Heavy Vehicle Mechanic or Automotive Heavy Mechanic.
- Certificate III (AQF Level 3) in Heavy Commercial Vehicle Mechanical Technology, Automotive Diesel Engine Technology, or equivalent trade qualification.
- Strong fault-finding and diagnostic skills in diesel engines and heavy vehicle mechanical systems.
- Experience repairing engines, transmissions, steering, suspension and braking systems.
- Experience using electronic diagnostic tools and interpreting technical manuals.
- Ability to work autonomously and as part of a high-performing maintenance team.
- Commitment to workplace health and safety.

Please submit your application through this website.

Only shortlisted candidates will be contacted.
