SAFETY NOTICE

Fletcher International Exports / Fletcher Grain wishes to advise ALL growers and transport operators as of January 1, 2018 all types of convertible trailers will no longer be permitted to deliver grain to the Fletcher Grain & Intermodal Terminal.

This decision is for the safety of staff and drivers whilst onsite, convertible trailers have a lower structural integrity than purpose built tipping trailers and pose an increased risk of 'roll over' occurring during the tipping process.

Examples of some convertible trailers are shown below, if you own a convertible trailer or similar and are unsure if it will be permitted to deliver to FIE we welcome you to contact our Transport manager for clarification.
