ABOUT THE COMPANY

Primarily, Fletcher's is a meat processing facility (abattoir).

Our business is vertically integrated across the supply chain. This means we feedlot lambs for processing, grow grains and other proteins for fodder and commercial supply, process the animal for meat, wool, hide, and other by-products and transport these goods (along with those of other local producers) directly to port in Botany Bay using our Fletcher owned trains!

JOBS AND TASKS

We are looking for people to fill multiple labouring roles (such as packing meat and trimming fat, processing co-products such as wool and hides) and also more experienced roles such as boning, slicing, and hide removal.

BENEFITS OF WORKING WITH US

We provide all training required on the job – we even provide and wash your uniform!

Wages are processed weekly.
